

DATAGARDENER MCP

UK Company Intelligence for AI Agents

From Artificial Intelligence to **Actual** Intelligence.

DataGardener MCP is a Model Context Protocol server from DataGardener Solutions Limited that gives authorised AI agents read-only access to connected UK company, financial, people, ownership, lending, procurement, public-spend, property and economic intelligence, with the source and date on records. A procurement, commercial or economic-development officer asks a question in plain English; the agent chooses the right intelligence tools, connects the evidence on company registration number, and returns an answer that shows its working.

EXAMPLE QUESTION

"Which SMEs won central government contracts in the last 12 months, and which of them show signs of financial stress in their latest accounts?"

What it answers

- Supplier due diligence: ownership, directors, accounts, charges, risk, awards, spend with other buyers
- Market engagement: SMEs, VCSEs and local suppliers who can deliver in a category
- Public spend: who buys what from whom, across councils, NHS bodies and departments
- Local economy: business population, sectors and growth by authority or constituency

Why it is trusted

- Source and date carried on records; sources used under the Open Government Licence
- Read-only tools; OAuth per connection; entitled modules; usage reported per call
- Built on the DataGardener platform already used by councils, NHS bodies, TfL, the GLA and the City of London
- Procurement index includes OCDS notices published under the Procurement Act 2023 regime

PROCUREMENT READINESS

ITEM	POSITION
Purchasing route	Crown Commercial Service supplier; three services on G-Cloud 14 (Lot 2, Cloud software). Bloom accredited supplier. Registered on the Cabinet Office Supplier Registration Service for the Low Value Purchase System (registration 1791038564).

Contacts

Local and regional economy

International trade

17M+ UK company records, 5.4M+ active businesses, 40+ verified data sources, updated daily (figures as published on datagardener.com, 3 October 2026). Customer names indicate organisations using the DataGardener platform; they do not indicate use of DataGardener MCP.

GETTING STARTED

1. Connect: add DataGardener MCP to a supported MCP environment such as Claude. 2. Authenticate: OAuth binds the connection to your entitlement. 3. Ask in natural language. 4. The agent investigates and shows its working. Pilots and design partnerships are open now; public bodies can purchase through G-Cloud 14.
